THERMAL ROLLERS

Turnkey solutions, adapted to each specific customers' needs

- Thermal roller using our Alveoltubes® profiles:
 - Alveolar structure allowing a cold fluid to pass through the alveolus
 - Low inertia when full
- A low volume of fluid is needed to insure a global light weight
 - 50% less weight compared with a double skin steel roller
- Excellent thermal transfer thanks to:
 - the thin skin
 - aluminium structure 2 to 3 superior to steel
- 2 flow types:
 - Admission and exhaust on opposite side
 - or on the same side
- Various diameters and lengths
 - Various cold fluids (air or liquid)
